

Web Endpoint and UI Testing

<u>Test</u>	<u>Status</u>
When shelter logs in successfully, they are redirected to requests page.	Good
When facebook login fails, they get an error message (from facebook in fb window).	Good
When a non-shelter user tries to log in, they see empty request lists.	Good
When the logout button is clicked, the user is logged out of facebook.	For some people. Others have to navigate to facebook to fully logout and get a fresh login popup again.
Requests and history pages inform user that their requests are being loaded if the requests are not yet displayed.	Good
When on the requests page, any pending requests for the shelter are shown, otherwise there is a message telling them they do not have any.	Good
When on the history page, any accepted/declined requests for the shelter are shown, otherwise there is a message telling them they do not have any.	Good
When a request is clicked, additional information is shown.	Good
Clicking on an expanded request collapses the extra info section.	Good
With a request expanded, clicking on another request opens that one and collapses previous.	Good
When a request is accepted/denied, on refresh it is no longer on requests page.	Good
When a request is accepted/denied, it shows up on the history page.	Good
When a request is accepted/denied then the undo button is hit, on refresh the request is still on the requests page.	Good
When a request is accepted or denied, the button of the respective action is in the disabled state.	Good

When on the history page and an undo button is hit, on refresh it is no longer on history page.	Good
When on the history page and an undo button is hit, it shows up on the requests page.	Good
When the browser window is resized, login screen retains the dog part of the image (within reason).	Good
When a user returns to the index page while logged in the user sees the normal index page and upon hitting Login, is redirected to the requests page.	Good
When the help button is hit, the web page redirects to the documentation website where the shelter manual is located.	Good
When the shelter denies a request, they have to enter a reason in order to complete the action.	Good
