

## **Team: Date-A-Dog: 11/15 Meeting Report**

**Members Present:** Lauren Wolfe, Alexis Allen, Amanda Loh, Hugo Salazaar, Raaj Pokhrel, Amarpal Khokhar (Skyped in due to illness), Hassan Abdi, AJ

### **Scheduled items and goals from last week:**

- Integrate SQL queries with function wrappers - **Lauren, Amarpal** - Completed
- Data population throughout android and web apps - **Hugo, Amanda, Hassan** - Completed
- Finish functionality to reflect one use case (document any bugs). - **AJ** - Completed
- Complete functionality for half of our use cases. - **Everyone** - Completed
- Create two types of unit tests - **Everyone** - Completed
- System tests for one use case - **To be claimed** - Completed
- Updating SDS and SRS: (**Lauren** will update DB Schema, **Hugo** will update class structure for web app) - Completed
- Preparing for product demo - **Alexis, Raag, Lauren** - Actually going to be Hugo, Raag, AJ.

### **Actual progress/learned technologies this week:**

**Paul:** Switched over to JSON V data store -- making it easier to ingest dog and shelter info from Petfinder; tested database calls.

**Amanda:** Tested db calls with Paul - verified working; Volley implemented calls, was all working; added to like page; Working on UI bugs.

**Alexis:** HTML Generated for request tables and accordion layout.

**AJ:** Refactored/added javadoc to api; fix travis CI errors; add unit tests.

**Hugo:** Implemented server calls; updating shelter approvals/declines works; working on accordion layout; data filtering.

**Hassan:** UI into android activities; android use cases work.

**Raag:** Facebook login and presentation.

**Lauren:** Ingested USPS zip code dataset and created class that accepts a zipcode and distance in miles as arguments and returns an ordered list of zipcodes within that region (based on latitude and longitudinal data).

### **Goals for next week:**

- Explore potential for session/token auth to verify before POST requests by shelter or user are integrated into DB (**Paul, Lauren**)
- Scrub data of non-dogs, non-compliant fields (websites in fax fields, etc) (**Amanda, AJ**)
- Presentation prep (**Raag, Hugo, AJ**)
- Zipcode integration (**Lauren, Paul**)
- Webapp UI issues (**Hugo, Alexis, Raag**)
- Spin up web development staging server on EC2 (**Lauren**)
