

Weekly Status Report – Date-a-Dog

Section 1

From previous report, we set the following goals be completed before 10/18/2016;

1. Complete the SRS document by Friday (10/14/2016). Task division;
 - i. Product Description – Hugo, Raag
 - ii. UI Diagrams – Amanda, Alexis, Lauren
 - iii. Use Cases – Amarpal, Hassan
 - iv. Process Description – AJ
2. Set up development environments.
3. Get a framework for unit tests set up.

Section 2

Our team successfully completed the SRS document and team website, in addition, we also obtained a developer account for Petfinder API. Due to unexpected circumstances, we were not able to complete tasks 2 and 3 above, however, we have assigned a higher priority and plan to complete both tasks by Wednesday this week. The team will continue to improve internal communications in order to prevent delays as we move forward with this week's tasks.

Although we had some disagreements, the team is quickly adapting to take a more democratic approach when making decisions. We effectively divided tasks that were manageable by each subgroup, and discovered that by identifying dependencies before ending the meeting allowed us to prioritize and set reasonable deadlines for each task, this resulted in continuous progress and prevented bottlenecks.

Section 3

We have carried over incomplete tasks from the previous week, and divided work for new tasks this week as follows;

1. Set up development environments by Wednesday (10/ 19) – All team members
2. Establish framework for unit test by Wednesday (10/19) - AJ
3. Complete SDS document by Friday (10/21)
 - i. System Architecture – AJ, Alexis, Amarpal, Hassan, Hugo, Lauren, Raag
 - a. Assumptions
 - b. Class diagrams
 - c. Sequence diagrams
 - ii. Process
 - a. Risk assessments – All team members
 - b. Project schedule – AJ
 - c. Team structure – Amanda
 - d. Test plan - Amanda
 - e. Documentation plan – AJ
 - f. Coding style - AJ
4. Prepare Design presentation by next Sunday (10/23) – Amanda, Amarpal, Hassan
