Team: Date-A-Dog: 11/22 Meeting Report

Members Present: Lauren Wolfe, Alexis Allen, Amanda Loh, Hugo Salazaar, Raaj Pokhrel, Amarpal Khokhar, Hassan Abdi, AJ

Scheduled items and goals from last week:

- Integrate SQL queries with function wrappers - **Lauren**, **Amarpal** (Mostly done already)
- Data population throughout android and web apps - **Hugo**, **Amanda**, **Hassan**
- Finish functionality to reflect one use case (document any bugs). - **AJ**
- Complete functionality for half of our use cases. - **Everyone**
- Create two types of unit tests - **Everyone**
- System tests for one use case - **To be claimed**
- Updating SDS and SRS: (**Lauren** will update DB Schema, **Hugo** will update class structure for web app)
- Preparing for product demo - **Alexis**, **Raag**, **Lauren**

Actual progress/learned technologies this week:

Amanda: Form activity DADApi. New callback for method login. Update users endpoint -- write the form back to the db.

Raag: Add help button to help page. Updated SRS. Updated user manual.

Lauren: Created a test webserver to test integration. Integrated python zipcode module to live server.

Hugo: Documentation for testing on backend of webapp. Implemented test coverage and mocha tests. Added more test cases.

AJ: Looking into code coverage tools.

Hassan: Making android unit tests using JSON.

Alexis: Change background to login screen. Cross browser compatibility.

Paul: Wrote backend tests for every endpoint.

Goals for next week:

Raag: Update SDS, testing documentation.

Lauren: Write unit tests, add developer documentation.

Hugo: Hide business logic so that we aren't delivering our fb API key.

AJ: Updating UI with form data.

Paul: Test authentication.
